

What Is the Legacy of the Renaissance and Baroque?

Core Competency: Teamwork

Both the Renaissance and Baroque influenced different cultures even after the styles had been replaced by new ideas. Working with one or two other students, decide which style has a greater legacy in our society. Do so by looking for the characteristics of each style in different current visual sources such as websites,

movies, advertisements, magazines, architecture, and so forth. As a group, put together a visual presentation that supports your point of view, incorporating three examples that illustrate your position and showing how they exemplify the characteristics of the style you have picked. Present your findings to your class.
