

# Probation and Parole in the United States, 2017-2018

Danielle Kaeble, *BJS Statistician*  
Mariel Alper, Ph.D., *former BJS Statistician*

In the United States, the adult population on probation or parole declined from 4,508,900 at the end of 2017 to 4,399,000 at the end of 2018, a decrease of 2.4% (figure 1).<sup>1</sup> An estimated 1 in 58 adults in the U.S. were under community supervision at year-end 2018. Adults on probation accounted for about 80% of those under community supervision, while parolees made up the remaining 20%.

From the end of 2017 to the end of 2018, the adult probation population declined from 3,647,200 to 3,540,000 (figure 2). This 2.9% decrease drove the entire decline in the population of adults under community supervision. The adult parole population remained relatively steady, increasing 0.3%, from 875,000 persons in 2017 to 878,000 in 2018 (figure 3).

<sup>1</sup>The community-supervision population excludes parolees also on probation to avoid double-counting. See *Methodology*.

**FIGURE 1**  
Adults on probation or parole, 2008-2018

Note: Counts for 2016 and earlier may have been revised based on updated reporting and may differ from numbers in past reports. Counts are for December 31 of each year. See table 1 for counts from 2008 to 2018.

\*Details may not sum to totals because the community-supervision counts were adjusted to exclude parolees who were also on probation. See table 3 for counts of parolees also on probation. Source: Bureau of Justice Statistics, Annual Probation Survey and Annual Parole Survey, 2008-2018.

## HIGHLIGHTS

- The total number of adults on probation or parole decreased by an estimated 109,900 offenders (down 2%) from 2017 to 2018, and by 694,400 (down 14%) from 2008 to 2018.
- The total community-supervision population in 2018 was at its lowest level since 1998.
- The portion of adults on community supervision fell 1.5% from 2016 to 2017, 3% from 2017 to 2018, and 22% from 2008 to 2018.
- In 2018, the portion of adults on community supervision was at its lowest level since 1990.
- An estimated 1 in 58 adults in the U.S. were under community supervision at the end of 2018, down from 1 in 45 in 2008.
- The adult probation population declined 3% from 2017 to 2018 and 17% from 2008 to 2018, while the adult parole population increased 0.3% from 2017 to 2018 and 6% from 2008 to 2018.
- The adult probation rate fell 25% from 2008 to 2018, while the adult parole rate fell 4%.
- In 2018, probation exits outpaced entries for the tenth consecutive year, while parole exits in 2017 exceeded entries for the first time since 2009.

The Bureau of Justice Statistics (BJS) collected the data in this report through the Annual Probation Survey, the Annual Parole Survey, and the Federal Justice Statistics Program. Data are collected on adults placed on supervision (entries) or removed from supervision (exits) during the reporting year and on population characteristics at year-end. These are the only national data collections that cover community corrections in all 50 states, the District of Columbia, and the U.S. federal system.

For this report, an adult is defined as any person subject to the jurisdiction of an adult court or correctional agency. Reporting methods for some probation and parole agencies have changed over time. (See *Methodology*.) Appendix tables 1 through 3 and 5 through 7 present additional 2018 data by jurisdiction. Appendix tables 9 through 11 and 13 through 15 present additional 2017 data by jurisdiction.

### Definition of probation and parole

*Probation* is a court-ordered period of correctional supervision in the community, generally as an alternative to incarceration. In some cases, probation may be a combined sentence involving incarceration followed by a period of community supervision.

*Parole* is a period of conditional supervised release in the community following a term in state or federal prison. Parolees include persons released through discretionary or mandatory supervised release from prison.

The definition of parole used in this report may differ from those in other statistical series published by the Bureau of Justice Statistics.

**FIGURE 2**  
Annual percent change of adults on probation, 2008-2018

Note: Counts for 2016 and earlier may have been revised based on updated reporting and may differ from numbers in past reports. See table 1 for counts from 2008 to 2018. Annual percent change is the difference in population from January 1 to December 31 for 2016 and from December 31 to December 31 for all other years. See *Probation and Parole in the United States, 2016* (NCJ 251148, BJS, April 2018).

## The decrease in probationers drove the overall decline in adults under community supervision

From the end of 2016 to the end of 2017, the total community-supervision population decreased 0.6%, from 4,537,100 to 4,508,900 (table 1). The adult probation population decreased by 25,900 (0.7%) over that time, while the adult parole population was relatively stable (increasing less than 0.05%). From 2017 to 2018, the community-supervision population declined from 4,508,900 to 4,399,000, as the number of adults on probation decreased by 107,300 and the number on parole increased by 3,000. Collectively, from 2016 to 2018, the total number of adults under community supervision declined 3.0%. During this 2-year span, persons on probation declined by 133,100 adults, while persons on parole increased by 3,200 adults. So the overall decline in the total number of adults under community supervision was due to the decline in the probation population.

In 2018, the community-supervision population was at its lowest level since 1998, when it was 4,122,400 (not shown in tables). It decreased 14% from 2008 to 2018. The community-supervision population has declined each year since 2007. The probation population

**TABLE 1**  
Adults under community supervision, 2008-2018

Year	Total*	Probation	Parole
2008	5,093,400	4,271,200	826,100
2009	5,019,900	4,199,800	824,600
2010	4,888,500	4,055,900	840,800
2011	4,818,300	3,973,800	855,500
2012	4,790,700	3,944,900	858,400
2013	4,749,800	3,912,900	849,500
2014	4,713,200	3,868,400	857,700
2015	4,650,900	3,789,800	870,500
2016	4,537,100	3,673,100	874,800
2017	4,508,900	3,647,200	875,000
2018	4,399,000	3,540,000	878,000
Percent change, December 31			
2008-2018	-13.6%	-17.1%	6.3%
2016-2018	-3.0	-3.6	0.4
2016-2017	-0.6	-0.7	<0.05
2017-2018	-2.4	-2.9	0.3

Note: Counts are rounded to the nearest 100. Details may not sum to totals due to rounding. Counts are for December 31 of each year. Percent change is the difference in populations on December 31. See *Methodology*.

\*Details may not sum to totals because community-supervision counts were adjusted to exclude parolees who were also on probation. See *Methodology*.

Source: Bureau of Justice Statistics, Annual Probation Survey and Annual Parole Survey, 2008-2018.

has declined each year since 2007, when it peaked at 5,115,500 (not shown in tables). In comparison, the parole population increased 6% from 2008 to 2018, and 2018 marked its fifth consecutive year of growth.

## The rate of adults supervised in the community fell to 1,726 per 100,000 U.S. adult residents in 2018

The rate of adults under community supervision declined 3% from the end of 2017 to the end of 2018, from 1,784 to 1,726 offenders per 100,000 U.S. adult residents (table 2). During that time, the rate of adults on probation declined 4% (from 1,443 to 1,389 per 100,000), and the rate of adults on parole decreased 0.6%, from 346 to 344 per 100,000. From 2016 to 2017, the rate of adults on community supervision fell 1.5%, as the probation rate fell 1.6% and the parole rate fell 0.9%. In 2018, the community-supervision rate was at its lowest level since 1990, when it was 1,720 per 100,000 (not shown in tables). It decreased 22% from 2008 to 2018 and 1.9% from 1998 to 2018 (not shown in tables). The community-supervision and probation rates have decreased for 11 consecutive years since 2008, while the parole rate has decreased since 2015.

**TABLE 2**  
Community-supervision rates of U.S. adult residents, 2008-2018

Year	Per 100,000 U.S. adult residents			U.S. adult residents on—		
	Community supervision <sup>a,b</sup>	Probation	Parole	Community supervision <sup>a,b</sup>	Probation	Parole
2008	2,202	1,847	357	1 in 45	1 in 54	1 in 280
2009	2,148	1,797	353	1 in 47	1 in 56	1 in 283
2010	2,067	1,715	356	1 in 48	1 in 58	1 in 281
2011	2,017	1,663	358	1 in 50	1 in 60	1 in 279
2012	1,984	1,634	356	1 in 50	1 in 61	1 in 281
2013	1,946	1,603	348	1 in 51	1 in 62	1 in 287
2014	1,911	1,568	348	1 in 52	1 in 64	1 in 288
2015	1,872	1,526	350	1 in 53	1 in 66	1 in 285
2016	1,811	1,466	349	1 in 55	1 in 68	1 in 287
2017	1,784	1,443	346	1 in 56	1 in 69	1 in 289
2018	1,726	1,389	344	1 in 58	1 in 72	1 in 290

Note: Counts for 2016 and earlier may have been revised based on updated reporting and may differ from numbers in past reports. Rates are based on the total community-supervision, probation, and parole population counts as of December 31 of the reporting year and were calculated using U.S. Census Bureau estimates of the U.S. resident population of persons age 18 or older for January 1 of the following year.

<sup>a</sup>Includes adults on probation or parole.

<sup>b</sup>Details may not sum to totals because community-supervision counts were adjusted to exclude parolees who were also on probation. See *Methodology*.

## Exits from probation outnumbered entries by more than 65,000 in 2018

Movements onto (entries) and off of (exits) probation decreased 8% from 2017 to 2018, from an estimated 4,100,300 to an estimated 3,755,700 (figure 4). Entries and exits reflect the administrative caseloads of probation agencies. A person can enter or exit the probation system several times during a year or concurrently serve multiple sentences for separate crimes. Probation exits include successful completions of supervision; exits to serve a period of incarceration, including to receive treatment; and exits due to absconding, detainment, death, or other unsatisfactory reasons. (See appendix table 3.)

Probation entries decreased almost 10% in 2018, from an estimated 2,039,500 at year-end 2017 to an estimated 1,845,200 at year-end 2018. Probation exits decreased 7%, from an estimated 2,060,800 in 2017 to an estimated 1,910,500 in 2018. This was the first time since 1998 that

**FIGURE 4**  
Estimated total probation movements, entries, and exits, 2008-2018

Note: Counts for 2016 and earlier may have been revised based on updated reporting and may differ from numbers in past reports. Counts are rounded to the nearest 100. Counts are based on movements from January 1 to December 31 each year. See table 5 for counts from 2008 to 2018.

Source: Bureau of Justice Statistics, Annual Probation Survey, 2008-2018.

entries to and exits from probation were each under 2 million movements. In 2018, exits outpaced entries for the tenth consecutive year. The difference between the number of exits and entries grew from 21,300 in 2017 to 65,300 in 2018. (See table 5 for counts.)

## Parole entries increased for the first time since 2015

From 2017 to 2018, the number of offenders entering parole increased from an estimated 442,000 to 447,200 (up 5,200), while exits grew from 445,700 to 453,900 (up 8,200) (figure 5). This marked the first time that parole entries increased since 2015. Parole exits exceeded entries in 2017 and 2018, which had not occurred since 2009. Total movements onto and off of parole increased from 887,700 in 2017 to 901,100 in 2018. (See table 6 for counts.) From 2008 to 2018, total parole movements decreased 21%. While both entries to and exits from parole continued to decline, entries exceeded exits eight times since 2008.

**FIGURE 5**  
Estimated total parole movements, entries, and exits, 2008-2018

Note: Counts for 2016 and earlier may have been revised based on updated reporting and may differ from numbers in past reports. Counts are rounded to the nearest 100. Counts are based on movements from January 1 to December 31 each year. See table 6 for counts from 2008 to 2018.

## Methodology

The Bureau of Justice Statistics (BJS) began the Annual Probation Survey and Annual Parole Survey in 1980. The surveys collect data from U.S. probation and parole agencies that supervise adults. These data collections define adults as persons subject to the jurisdiction of an adult court or correctional agency. Juveniles sentenced as adults in a criminal court are considered adults. Juveniles under the jurisdiction of a juvenile court or correctional agency are excluded from these data.

### Data collections

Starting in January of each calendar year, the two surveys collect data on the number of adults supervised in the community on both January 1 and December 31 of the previous calendar year, the number of entries to and exits from supervision during the reporting year, and the characteristics of the probation and parole populations at year-end. (See appendix tables.) Both surveys cover the 50 states, the District of Columbia, and the U.S. federal system. BJS depends on the voluntary participation of state central reporters and separate state, county, and court agencies for these data. Data for the U.S. federal system were provided through the *Federal Justice Statistics Program* (FJSP) at BJS. The FJSP provides community-supervision data collected from the Office of Probation and Pretrial Services, Administrative Office of the U.S. Courts.

The 2018 *Annual Probation Survey* was sent to 454 agencies, one less than the 2017 survey due to the closure of one agency in Ohio. The 454 respondents included 40 central state agencies and the District of Columbia; 415 separate state, county, or court agencies; and the U.S. federal system. States with multiple state agencies included Alabama (3), Colorado (8), Florida (41), Georgia (2), Idaho (2), Kentucky (2), Michigan (129), Missouri (2), Montana (4), New Mexico (2), Ohio (182), Oklahoma (3), Pennsylvania (2), Tennessee (3), and Washington (32). Georgia and Pennsylvania are both included as central state agencies, but each provides data from two departments within the state government. Of the 454 agencies in the population frame, 4 in Florida, 13 in Michigan, 1 in Montana, 1 in New Mexico, 13 in Ohio, and 4 in Washington provided no data for the 2018 collection. The final response rate for the 2018 Annual Probation Survey was 92.1%.

Of the 455 agencies in the population frame in 2017, 1 in Alabama, 1 in Alaska, 9 in Florida, 1 in Kentucky, 10 in Michigan, 1 in New Mexico, 20 in Ohio, and 4 in Washington provided no data for the 2017 collection.

The final response rate for the 2017 Annual Probation Survey was 89.7%.

The 2017 and 2018 *Annual Parole Survey* was sent to 52 agencies: 50 central state reporters, the District of Columbia, and the U.S. federal system. In this report, federal parole includes a term of supervised release from prison, mandatory release, parole, military parole, and special parole. At sentencing, a federal judge orders a term of supervised release, which is served after release from a federal prison sentence. In the case of Alaska, probationers and parolees were supervised under a common program, and the state's data-provider was unable to report probation and parole counts separately. The state reported combined probationer and parolee counts through the probation questionnaire. January 1, 2018 and December 31, 2018 parolee counts were imputed for Alaska (see *Imputing the January 1 parole population* and *Imputing the December 31 parole population*, below), and these figures were deducted from the combined reported totals for calculating the state's January 1 and December 31 probationer counts. The final response rate for the 2018 Annual Parole Survey was 100%.

Alaska did not report parole populations for the 2017 collection year. (See *Imputing the January 1 parole population*.) The final response rate for the 2017 Annual Parole Survey was 98.1%.

### Types of federal offenders under community supervision

Since the Sentencing Reform Act of 1984 was enacted on November 1, 1987, offenders sentenced to federal prison are no longer eligible for parole but are required to serve a term of supervised release following release from prison. Those sentenced to prison prior to November 1, 1987 continue to be eligible for parole, as do persons violating laws of the District of Columbia, military offenders, and offenders transferred under foreign treaties. (See <http://www.uscourts.gov/services-forms/overview-probation-supervised-release-conditions>.)

In 2008, the *Annual Parole Survey* included a new type of entry-to-parole category (term of supervised release) to better classify the large majority of entries to parole reported by the U.S. federal system. The term is a fixed period of release to the community that follows a fixed period of incarceration based on a determinate sentencing statute. Both are determined by a judge at the time of sentencing. For details about estimating methods used to analyze national trends for all types of entry to parole, see *Probation and Parole in the United States, 2010* (NCJ 236019, BJS, November 2011).

The Sentencing Reform Act also required the adoption and use of sentencing guidelines, which took effect on the same day. Many offenses for which probation had been the typical sentence prior to this date, particularly property and regulatory offenses, subsequently resulted in sentences to prison. Changes in how federal offenders are supervised in the community were first described in the BJS report *Federal Offenders under Community Supervision, 1987-96* (NCJ 168636, BJS, August 1998) and were updated in *Federal Criminal Case Processing, 2002: With Trends 1982-2002, Reconciled Data* (NCJ 207447, BJS, January 2005).

### Adjustment and changes in parole and population counts

#### Dual community-supervision status

Some persons on probation or parole may have had dual community-supervision statuses because they were serving separate probation and parole sentences at the same time. Beginning with 2007 data, BJS began collecting information on the number of parolees who were also on probation at year-end. To avoid double counting, the total community-supervision populations from 2008 through 2018 reported in figure 1 (and the 2018 counts in appendix table 1) have been adjusted based on available information by excluding the total number of parolees who were also on probation. As a result, the probation and parole counts from 2007 through 2018 do not sum to the community-supervision population. All counts for parolees with dual community-supervision statuses reflect data reported by parole agencies that could provide the information for the reporting year. In 2018, 21 agencies provided data. The total number of parolees also on probation from 2007 to 2018 may be underestimated due to non-responding agencies.

#### Changes in adults on probation and parole

In each collection year, respondents are asked to provide both the January 1 and December 31 population counts for the previous year. Therefore, while the December 31, 2017 count was collected in 2018, the January 1, 2018 count was not collected until 2019. At times, the January 1 count from a given year may differ from the December 31 count of the prior year, given the normal daily flow of entries and exits. Additionally, the difference reported may have resulted from administrative changes, such as—

- implementing new information systems, leading to data review and cleanup
- reconciling probationer records

- reclassifying offenders, including those on probation to parole and those with dual community-supervision statuses
- including certain probation populations not previously reported (e.g., persons supervised for DUI or DWI, some probationers who had absconded, and some on an inactive status).

The difference between the probation counts for December 31, 2017 and January 1, 2018 resulted in a decrease of 45,010 probationers (table 4). The

**TABLE 3**  
Parolees on probation excluded from the January 1 and December 31 community-supervision populations, 2007-2018

Year	January 1*	December 31
2007	...	3,562
2008	3,562	3,905
2009	3,905	4,959
2010	8,259	8,259
2011	8,259	10,958
2012	10,958	12,672
2013	12,672	12,511
2014	12,511	12,919
2015	12,919	9,375
2016	9,375	10,822
2017	10,822	13,302
2018	13,302	18,878

Note: Counts for 2016 and earlier may have been revised based on updated reporting and may differ from numbers in past reports. The community-supervision counts were adjusted to exclude parolees who were also on probation.

...Not available.

\*For 2011 through 2018, data are based on the December 31 count of the prior reporting year. For 2010, the December 31, 2010 count was used as a proxy because additional states reported these data in 2010.

Source: Bureau of Justice Statistics, Annual Probation Survey and Annual Parole Survey, 2008-2018.

**TABLE 4**  
One-day difference based on reporting changes for probation and parole, 2008-2018

Year	Probation population difference from December 31 to January 1 of the following year	Parole population difference from December 31 to January 1 of the following year
2008	-33,670	1,390
2009	-73,120	13,700
2010	-2,400	-80
2011	9,770	-2,830
2012	2,960	-23,640
2013	20,980	540
2014	9,750	170
2015	-64,150	130
2016	5,030	2,200
2017	-45,010	-1,240

Note: Counts are calculated as the difference between December 31 of the year displayed and January 1 of the following year and are rounded to the nearest 10.

Source: Bureau of Justice Statistics, Annual Probation Survey and Annual Parole Survey, 2008-2018.

difference between the parole population counts for December 31, 2017 and January 1, 2018 resulted in a decrease of 1,240 parolees. The difference between the probation counts for December 31, 2016 and January 1, 2017 resulted in an increase of 5,030 probationers. The difference between the parole population counts for December 31, 2016 and January 1, 2017 resulted in an increase of 2,200 parolees.

### Estimating change in population counts

In theory, the change in probation and parole populations from the beginning to the end of the year should equal the difference between entries and exits during the year. In practice, those numbers may not be equal. Some probation and parole information systems track the number of cases that enter and exit community supervision, not the number of persons, while January 1 and year-end populations represent persons. Some persons are being supervised for more than one charge or case simultaneously. Additionally, all data on entries and exits may not have been logged into the respondents' information systems, or the information systems may not have fully processed all data before submission to BJS.

As a result, the January 1, 2018 population, plus entries, minus exits, is 3,040 fewer persons than the published December 31 population at the national level. For parolees, the calculated total is 10,900 fewer persons than the published December 31 population. (Estimates of annual change reported in appendix tables 1, 2, and 5 were calculated as the difference between the January 1 and December 31 populations within the reporting year.) The January 1, 2017 population, plus entries, minus exits, is 9,600 persons more than the published December 31 population at the national level. For parolees, the calculated total is 1,700 fewer persons than the published December 31 population. (Estimates of annual change reported in appendix tables 9, 10, and 13 were calculated as the difference between the January 1 and December 31 populations within the reporting year.) Tables 5 and 6 include the counts behind figures 4 and 5 on page 4. Respondents report all entries and exits from January 1 to December 31 each year.

As discussed, jurisdiction counts reported for January 1 may differ from December 31 counts reported in the previous year. As a result, the direction of change based on year-end data could be in the opposite direction of the within-year change.

**TABLE 5**  
Estimated total probation movements, entries, and exits, 2008-2018

Year	Total movements	Probation entries	Probation exits
2008	4,663,500	2,346,600	2,316,900
2009	4,597,000	2,283,300	2,313,700
2010	4,442,300	2,185,500	2,256,800
2011	4,287,600	2,104,800	2,182,800
2012	4,122,900	2,042,900	2,080,000
2013	4,220,200	2,093,600	2,126,600
2014	4,194,900	2,065,800	2,129,100
2015	4,009,300	1,966,100	2,043,200
2016	4,083,600	2,012,200	2,071,400
2017	4,100,300	2,039,500	2,060,800
2018	3,755,700	1,845,200	1,910,500

Note: Counts for 2016 and earlier may have been revised based on updated reporting and may differ from numbers in past reports. Counts are rounded to the nearest 100. Counts are based on movements from January 1 to December 31 each year.

Source: Bureau of Justice Statistics, Annual Probation Survey, 2008-2018.

**TABLE 6**  
Estimated total parole movements, entries, and exits, 2008-2018

Year	Total movements	Parole entries	Parole exits
2008	1,141,900	575,500	566,400
2009	1,144,000	570,700	573,300
2010	1,128,300	565,500	562,800
2011	1,080,900	546,300	534,600
2012	997,700	500,900	496,800
2013	921,100	467,200	453,900
2014	913,900	461,100	452,800
2015	938,900	475,200	463,700
2016	913,100	457,100	456,000
2017	887,700	442,000	445,700
2018	901,100	447,200	453,900

Note: Counts for 2016 and earlier may have been revised based on updated reporting and may differ from numbers in past reports. Counts are rounded to the nearest 100. Counts are based on movements from January 1 to December 31 each year.

Source: Bureau of Justice Statistics, Annual Parole Survey, 2008-2018.

In figures 1 through 3, change was calculated as the difference between December 31 populations for each year, with the exception of 2016. Change in 2016 was measured from January 1, 2016 to December 31, 2016. This was due to the large discrepancy from December 31, 2015 to January 1, 2016 caused by reporting changes in multiple states. Annual change in reports prior to 2013 was calculated as the difference between the January 1 and December 31 populations within the reporting year.

## **Imputing for non-reporting agencies**

BJS used the following methods to impute missing probation and parole data for key items, including the January 1 population, entries, and exits and the December 31 population.

### ***Imputing the January 1 probation population***

When the January 1 probation population was missing, the December 31 probation population from the last reported year going back to 2010 was carried forward.

This method was used to estimate the January 1, 2018 probation population in 38 non-reporting counties and district agencies in Florida, Michigan, Montana, New Mexico, Ohio, and Washington. The January 1, 2018 population was imputed for 0.8% of the total probation population. This method was used to estimate the January 1, 2017 probation population in 45 non-reporting counties and district agencies in Alabama, Florida, Kentucky, Michigan, New Mexico, Ohio, and Washington. The January 1, 2017 population was imputed for 1.4% of the total probation population.

### ***Imputing the December 31 probation population***

When counts were missing for the December 31 probation population, the missing values were imputed by assuming no intra-year growth and setting the missing value to the January 1 population size.

This method was used to estimate the December 31, 2018 probation population in 37 non-reporting counties and district agencies in Florida, Kentucky, Michigan, Montana, New Mexico, Ohio, and Washington. The December 31, 2018 population was imputed for 0.9% of the total probation population. This method was used to estimate the December 31, 2017 probation population in 48 non-reporting counties and district agencies in Alabama, Alaska, Florida, Kentucky, Michigan, New Mexico, Ohio, and Washington. The December 31, 2017 population was imputed for 1.7% of the total probation population.

### ***Imputing probation entries***

Based on the availability of data, BJS used four methods of ratio estimation to impute probation entries for agencies not reporting these data. Total entries to probation were imputed for 14.2% of the entry population in 2018 and 21.9% of the entry population in 2017.

The first method was used for agencies that reported all four key items in at least one year since 2010 and for which the January 1 and December 31 populations of the reporting year were equal (likely due to the imputation of one or both of those variables). The entries and exits in the most recent of those years were divided by the beginning and year-end populations from the same year (stock overflow), and the resulting ratio was multiplied by the January 1 population. When this method was used, entries and exits were imputed with the same value.

This method was used to estimate probation entries in 46 non-reporting counties and district agencies in Florida, Michigan, Missouri, Montana, New Mexico, Ohio, and Washington in 2018 and 47 non-reporting counties and district agencies in Alabama, Florida, Kentucky, Michigan, New Mexico, Ohio, and Washington in 2017.

The second method estimated probation entries for agencies that did not report all four core variables in any single year since 2010 or had different beginning and year-end populations. The ratio of prior-year entries to the January 1 population from the previous year was multiplied by the reporting-year January 1 population to derive the reporting-year entries. This method was used to estimate probation entries and exits for five non-reporting counties and district agencies in Florida, Michigan, Ohio, and Washington in 2018 and seven non-reporting counties and district agencies in Michigan, Ohio, and Washington in 2017.

The third method estimated entries in agencies with small populations. This method estimated the relationship between reporting-year entries and the January 1 population of the same year by calculating the ratio of the sums of these variables across similar-size agencies within the same state. This ratio was then multiplied by the January 1 value to obtain entries. To ensure the stability of the ratio estimator, this method was employed only in states with at least 30 reporting units and was used for six agencies in Florida and Ohio in 2018 and six agencies in Florida, Michigan, and Ohio in 2017.

The fourth method took the ratio of the prior-year imputed entries to the January 1 probation population of the prior year and applied that ratio to the agency's January 1 population of the reporting year. This method was used to estimate probation entries and exits for four non-reporting agencies in Rhode Island, Vermont, Washington, and Wisconsin in both 2018 and 2017.

### ***Imputing the January 1 parole population***

When the January 1 parole population was missing, the December 31 probation population from the prior year was carried forward. This method was used to estimate the January 1 parole population in both 2018 and 2017 for Alaska, which represented 0.2% of the total parole population.

### ***Imputing the December 31 parole population***

When counts were missing for the December 31 parole population, the missing values were imputed by adding to (or subtracting from) the January 1 parole population to estimate population change based on what was observed in the prior year. The intra-year change in population from January 1 to December 31 of the prior year was multiplied by the January 1 reporting-year count to estimate the reporting-year population change. This method was used to estimate the December 31 parole population for Alaska, which represented 0.2% of the total parole population in 2018 and 2017.

### ***Imputing parole entries***

To estimate parole entries for agencies that did not report these data in the reporting year but did report in the prior year, BJS calculated the ratio of entries in the prior year to the agency's parole population on January 1 of the

prior year and applied that ratio to the agency's January 1 population of the reporting year. This method was used to estimate parole entries in Alaska, Vermont, and Wisconsin. Total entries were imputed for 1.7% of the entering parole population in 2018 and 1.9% in 2017.

### ***Imputing probation and parole exits***

A single method was used to estimate exits from probation that were not imputed with the first method noted above and for all parole agencies. For both probation and parole, BJS added each agency's estimated entries to that agency's population on January 1 and subtracted that estimate from the population on December 31.

For probation, this method was used for 46 non-reporting agencies in Colorado, Florida, Michigan, Ohio, Rhode Island, Vermont, Washington, and Wisconsin in 2018 and totaled 2.1% of the exiting probation population. In 2017, this method was used for 24 non-reporting agencies in Alaska, Colorado, Florida, Michigan, Ohio, Rhode Island, Vermont, Washington, and Wisconsin, totaling 2.3% of the exiting probation population.

For parole, this method was used in Alaska, Vermont, and Wisconsin. Total exits were imputed for 1.8% of the exiting parole population in 2018 and 2.0% in 2017.

## Probation: Explanatory notes for 2018

Probation agencies vary in their ability to provide counts each year consistent with Bureau of Justice Statistics (BJS) definitions. Some agencies report the number of cases, while others report the number of persons they supervise. Because a person can have multiple probation sentences, counting cases can artificially inflate probation totals. BJS requests that agencies report the number of persons under supervision, and each year some agencies make the conversion, resulting in what appears to be a large decrease from previous years' data. BJS documents these and other reporting anomalies below.

**Alaska**—The state supervises probation and parole in a combined program. The state agency was unable to report probation and parole data separately, so both populations were reported in the probation survey. The January 1, 2018 and December 31, 2018 probation population counts were derived based on the difference between the reported probation and imputed parole count (imputed using the December 31, 2017 parole population count).\*

**Florida**—Non-reporting agencies in 2018—four local agencies did not report data. The December 31, 2017 population count was used to estimate January 1, 2018 and December 31, 2018 counts for these agencies. Four other agencies did not report the number of entries to probation, and three did not report the number of exits from probation.\*

**Georgia**—Non-reporting agencies in 2018—one state agency did not report the number of entries to probation.\*

**Michigan**—Reporting changes from 2017 to 2018—one agency reported that changes in state laws, specifically the legalization of marijuana and the reduction of a Minor in Possession violation from a criminal misdemeanor to a civil infraction for the first offense, have dramatically reduced the agency's numbers. Non-reporting agencies in 2018—13 local agencies did not report data. For the non-reporting agencies, December 31, 2017 population counts were used to estimate January 1, 2018 and December 31, 2018 populations. Other agencies did not report the number of entries to or exits from probation.\*

**Missouri**—Non-reporting agencies in 2018—one local agency did not report the number of entries to or exits from probation.\*

**Montana**—Non-reporting agencies in 2018—one local agency did not report data. December 31, 2017 population counts were used to estimate January 1, 2018 and December 31, 2018 populations.\*

**New Mexico**—Non-reporting agencies in 2018—one local agency did not report data. For the non-reporting agency, December 31, 2017 population counts were used to estimate January 1, 2018 and December 31, 2018 populations.\*

**Ohio**—Non-reporting agencies in 2018—13 local agencies did not report data. For the non-reporting agencies, the December 31, 2017 population count was used to estimate January 1, 2018 and December 31, 2018 populations. One agency did not report the January 1, 2018 population total. Other agencies did not report data on entries to or exits from probation.\*

**Rhode Island**—Non-reporting agencies in 2018—the state agency did not report data on entries to or exits from probation.\*

**Vermont**—Non-reporting agencies in 2018—the state agency did not report data on entries to or exits from probation.\*

**Washington**—Non-reporting agencies in 2018—four local agencies did not report data. For the non-reporting agencies, December 31, 2017 population counts were used to estimate January 1, 2018 and December 31, 2018 populations. Other agencies did not report the number of entries to or exits from probation.\*

**Wisconsin**—The state probation agency, overseeing the entire state probation population, was able to report the number of probationers who died or absconded but not the total number of entries to or exits from probation during 2018. Total entries and exits were imputed for 2018.\*

---

\*See *Imputing for non-reporting agencies*.

## Parole: Explanatory notes for 2018

Each year, changes in legislation or offender management systems require states to alter previously submitted data or the data they can currently submit. The Bureau of Justice Statistics documents these changes as reported by the respondents.

**Alaska**—Alaska supervises probation and parole in a combined program. The state agency was unable to report probation and parole data separately, so both populations were reported in the probation survey. The January 1, 2018 and December 31, 2018 parole population counts were imputed based on the December 31, 2017 parole population count.\*

**California**—Parole data included Post-Release Community Supervision and Mandatory Supervision populations of 45,899 on January 1, 2018 and 55,216 on December 31, 2018, with 28,324 entries to and 31,699 exits from parole.

**Connecticut**—Reporting changes from 2017 to 2018—the Board of Pardons & Paroles reported that while the supervised population increased because the incarcerated population decreased in 2018, data sources were also different from prior years, which would lead to minor differences in data reported.

**Massachusetts**—Reporting changes from 2017 to 2018—the state reported only adult parolees committed to a Massachusetts institution and supervised in one of the nine regional parole offices or under the Warrant and Apprehension Unit of the Field Services Division. The caseload reported for the 2017 survey included interstate compact cases supervised by a Massachusetts jurisdiction for another state and adult parolees supervised by a Massachusetts jurisdiction but legally the responsibility of another jurisdiction.

**Montana**—Reporting changes from 2017 to 2018—the state converted all offender location data from one system to another in November 2018. Therefore, the population reported in 2019 for January 1, 2018 differed from the population reported in 2018 for December 31, 2017.

**Ohio**—The total parole population included a small, undetermined number of persons under concurrent parole and local probation supervision, temporary jail detention pending a revocation hearing, and temporary prison custody pending a revocation hearing.

**Pennsylvania**—The Pennsylvania Department of Corrections reported that 7 of the 65 participating county probation departments did not respond to the survey and that these counties' populations were estimated based on the prior year's caseload.

**Vermont**—Reporting changes from 2017 to 2018—the Vermont Department of Corrections improved its data analysis techniques to ensure a correct count of persons on parole. The state was unable to report the number of entries to or exits from parole.\*

---

\*See *Imputing for non-reporting agencies*.

## Probation: Explanatory notes for 2017

Probation agencies vary in their ability to provide counts each year consistent with Bureau of Justice Statistics (BJS) definitions. Some agencies report the number of cases, while others report the number of persons they supervise. Because a person can have multiple probation sentences, counting cases can artificially inflate probation totals. BJS requests that agencies report the number of persons under supervision, and each year some agencies make the conversion, resulting in what appears to be a large decrease from previous years' data. BJS documents these and other reporting anomalies below.

**Alabama**—Non-reporting agencies in 2017—one local agency did not report data. For the non-reporting agency, December 31, 2016 population counts were used to estimate January 1, 2017 and December 31, 2017 populations.\*\*

**Alaska**—Non-reporting agencies in 2017—the state agency was able to report a probation population on January 1, 2017 and entries to probation in 2017, but did not provide any additional data. January 1, 2017 was used to estimate the probation population on December 31, 2017 and exits from probation.\*\*

**Colorado**—Non-reporting agencies in 2017—one local agency did not report data on exits from probation.\*\*

**Florida**—Non-reporting agencies in 2017—nine local agencies did not report data. For the non-reporting agencies, the most recently available December 31 population count was used to estimate January 1, 2017 and December 31, 2017 counts.\*\*

**Georgia**—Reporting changes from 2016 to 2017—a change in Georgia law, effective in 2017, allows the Department of Community Supervision to move a probationer to unsupervised status after 2 years and may be applied retroactively, provided that any restitution ordered be paid in full prior to allowing someone to be moved to unsupervised status. The other changes in status from prior years are due to a more accurate breakdown of cases not calculated in previous surveys. Non-reporting agencies in 2017—one state agency did not report the number of probation entries.\*\*

**Kentucky**—Non-reporting agencies in 2017—one local agency did not report data. For the non-reporting agency, December 31, 2016 population counts were used to estimate January 1, 2017 and December 31, 2017 populations.\*\*

**Michigan**—Non-reporting agencies in 2017—10 local agencies did not report data. For the non-reporting agencies, December 31, 2016 population counts were used to estimate January 1, 2017 and December 31, 2017 populations. One agency did not report the January 1, 2017 population total. Other agencies did not report the number of entries to or exits from parole.\*\*

**Montana**—Non-reporting agencies in 2017—one local agency did not report data on entries to probation.\*\*

**New Mexico**—Non-reporting agencies in 2017—one local agency did not report data. For the non-reporting agency, December 31, 2016 population counts were used to estimate January 1, 2017 and December 31, 2017 populations.\*\*

**North Dakota**—Non-reporting agencies in 2017—the state agency did not report data on entries to probation.\*\*

**Ohio**—Reporting changes from 2016 to 2017—many agencies have been undergoing a change to their case management systems per statewide guidance. Agencies either struggled to report data in 2017 due to the change or reported that data were not comparable to previous years due to the change. Non-reporting agencies in 2017—20 local agencies did not report data. For the non-reporting agencies, the most recently available December 31 population count was used to estimate January 1, 2017 and December 31, 2017 populations. Other agencies did not report data on entries to or exits from probation.\*\*

**Oklahoma**—Reporting changes from 2016 to 2017—a municipal court was able to obtain more accurate information from its system starting in 2017. This change resulted in an increase of 9,000 probationers in 2017.

**Rhode Island**—Non-reporting agencies in 2017—the state agency did not report data on entries to or exits from probation.\*\*

---

\*\*See *Imputing for non-reporting agencies*.

**Vermont**—Non-reporting agencies in 2017—the state agency did not report data on entries to or exits from probation.\*\*

**Washington**—Non-reporting agencies in 2017—four local agencies did not report data. For the non-reporting agencies, December 31, 2016 population counts were used to estimate January 1, 2017 and December 31, 2017 populations. Other agencies did not report the number of entries to or exits from probation.\*\*

**Wisconsin**—The state probation agency, overseeing the entire state probation population, was able to report the number of probationers who died or absconded but not the total number of exits or entries to probation during 2017. Total entries and exits were imputed for 2017.\*\*

## Parole: Explanatory notes for 2017

Each year, changes in legislation or offender management systems require states to alter previously submitted data or data they can currently submit. The Bureau of Justice Statistics documents these changes as reported by the respondents.

**Alaska**—Non-reporting agency in 2017—the state did not provide parole data for 2017. All 2017 populations were estimated.\*\*

**California**—Parole data included Post-Release Community Supervision and Mandatory Supervision populations of 44,998 on January 1, 2017 and 45,899 on December 31, 2017, with 26,418 entries to and 25,517 exits from parole.

**Georgia**—Updates to state law allow the State Board of Pardons and Paroles to consider commuting sentences of parolees serving a split sentence for a non-violent property or drug offense after the satisfactory completion of parole supervision.

**Indiana**—Reporting changes from 2016 to 2017—the Indiana Department of Corrections experienced a significant change in its parole population due to changes in state law concerning who is eligible to come to state prison. The state completely rewrote its criminal code, which affects prisoners admitted since July 2014, provides different sentences for every offense, and adds new “theft levels” and jurisdictions. As a result, the state agency went from having 20,000 to 11,000 prison admissions in 2017. These changes shifted many persons from state to county jurisdiction, and the lowest level of felony was no longer eligible for state prison.

**Vermont**—Reporting changes from 2016 to 2017—the Vermont Department of Corrections improved its data analysis techniques to ensure a correct count of persons on parole. These updates accounted for the decrease in the number of parolees. Vermont was unable to report the number of entries to or exits from parole.\*\*

---

\*\*See *Imputing for non-reporting agencies*.

**APPENDIX TABLE 1**
**Adults under community supervision, 2018**

Jurisdiction	Community-supervision population, January 1, 2018 <sup>a</sup>	Entries		Exits		Community-supervision population, December 31, 2018 <sup>a</sup>	Change, January 1, 2018-December 31, 2018		Number under community supervision per 100,000 U.S. adult residents, December 31, 2018 <sup>c</sup>

Note: Counts are rounded to the nearest 100. Details may not sum to totals due to rounding. Data quality may vary across jurisdictions for counts of entries and exits. Therefore, the population on December 31, 2018 does not equal the population on January 1, 2018, plus entries, minus exits. Rates are based on the total community-supervision, probation, and parole population counts as of December 31 of the reporting year and were calculated using U.S. Census Bureau estimates of the U.S. resident population of persons age 18 or older for January 1 of the following year.

..Not known.

<sup>a</sup>The January 1 population excludes 13,302 persons. The December 31 population excludes 18,878 parolees who were also on probation to avoid double counting. See *Methodology*.

<sup>b</sup>Reported data will equal estimated data in cases where no imputation was required.

<sup>c</sup>Rates were calculated using the estimated U.S. adult resident population in each jurisdiction on January 1, 2019.

<sup>d</sup>See *Probation: Explanatory notes for 2018* and *Parole: Explanatory notes for 2018* for more details.

<sup>e</sup>The only exits reported were deaths.

Note: Data quality may vary across jurisdictions for counts of entries and exits. Therefore, the population on December 31, 2018 does not equal the population on January 1, 2018, plus entries, minus exits. Counts may not be actual as reporting agencies may provide estimates on some or all detailed data. Rates are based on the probation population counts as of December 31 of the reporting year and were calculated using U.S. Census Bureau estimates of the U.S. resident population of persons age 18 or older for January 1 of the following year.

..Not known.

<sup>a</sup>Reported data will equal estimated data in cases where no imputation was required.

<sup>b</sup>Rates were calculated using the estimated U.S. adult resident population in each jurisdiction on January 1, 2019.

<sup>c</sup>See *Probation: Explanatory notes for 2018* for more details.

<sup>d</sup>The only exits reported were deaths.

Note: Based on reported data only. For imputed exits from probation, see appendix table 2. Counts may not be actual as reporting agencies may provide estimates on some or all detailed data.

..Not known.

~Not applicable.

<sup>a</sup>Includes probationers discharged from supervision when they did not complete the conditions of probation or fulfill obligations.

<sup>b</sup>Includes 15,213 probationers who transferred to another jurisdiction and 38,347 probationers who exited supervision for other reasons.

<sup>c</sup>Some or all data were estimates.

Source: Bureau of Justice Statistics, Annual Probation Survey, 2018.

**APPENDIX TABLE 4****Characteristics of adults on probation, 2008 and 2018**

Characteristic	2008	2018
<b>Sex</b>	100%	100%
Male	76	75
Female	24	25
<b>Race/ethnicity</b>	100%	100%
White <sup>a</sup>	56	55
Black <sup>a</sup>	29	30
Hispanic	13	13
American Indian/Alaska Native <sup>a</sup>	1	1
Asian <sup>a</sup>	1	1
Native Hawaiian/Other Pacific Islander <sup>a</sup>	<1	<1
Two or more races <sup>a</sup>	1	<1
<b>Status of supervision</b>	100%	100%
Active	71	68
Residential/other treatment program	1	1
Financial conditions remaining	2	3
Inactive	8	6
Absconder	8	9
Supervised out of jurisdiction	3	3
Warrant status	6	5
Other	2	5
<b>Type of offense</b>	100%	100%
Felony	50	62
Misdemeanor	48	36
Other infraction	2	2
<b>Most serious offense</b>	100%	100%
Violent	19	22
Domestic violence	4	4
Sex offense	3	4
Other violent offense	12	14
Property	25	25
Drug	28	26
Public order	17	14
DUI/DWI	14	12
Other traffic offense	4	2
Other <sup>b</sup>	10	12

Note: Details may not sum to totals due to rounding. Estimates for 2008 may have been revised based on updated reporting and may differ from numbers in past reports. Characteristics are based on probationers with a known status.

<sup>a</sup>Excludes persons of Hispanic origin (e.g., “white” refers to non-Hispanic whites and “black” refers to non-Hispanic blacks).

<sup>b</sup>Includes other offenses, such as public intoxication, disorderly conduct, false statement, insufficient funds, and other miscellaneous charges.

Wyoming	900	651	651	617	617	934	34	3.8	211

Note: Data quality may vary across jurisdictions for counts of entries and exits. Therefore, the population on December 31, 2018 does not equal the population on January 1, 2018, plus entries, minus exits. Counts may not be actual as reporting agencies may provide estimates on some or all detailed data. Rates are based on the parole population counts as of December 31 of the reporting year and were calculated using U.S. Census Bureau estimates of the U.S. resident population of persons age 18 or older for January 1 of the following year.

..Not known.

<sup>a</sup>Reported data will equal estimated data in cases where no imputation was required.

<sup>b</sup>Rates were calculated using the estimated U.S. adult resident population in each jurisdiction on January 1, 2019.

<sup>c</sup>See *Parole: Explanatory notes for 2018* for more details.

<sup>d</sup>Includes Post-Release Community Supervision and Mandatory Supervision parolees: 45,899 on January 1, 2018 and 55,216 on December 31, 2018, with 28,324 parole entries and 31,699 parole exits.

<sup>e</sup>The only exits reported were deaths.

Wyoming	651	578	0	73	0	0	0

Note: Based on reported data only. For imputed entries to parole, see appendix table 5. Counts may not be actual as reporting agencies may provide estimates on some or all detailed data.

..Not known.

~Not applicable.

<sup>a</sup>Includes persons entering due to a parole board decision.

<sup>b</sup>Includes persons whose release from prison was not decided by a parole board and persons entering due to determinate sentencing, good-time provisions, or emergency releases.

<sup>c</sup>Includes persons returned to parole after serving time in prison due to a parole violation. Depending on the reporting jurisdiction, reinstatement entries may include only parolees who were originally released from prison through a discretionary release, mandatory release, or a combination of both. May also include persons originally released through a term of supervised release.

<sup>d</sup>Includes persons sentenced by a judge to a fixed period of incarceration based on a determinate statute immediately followed by a period of supervised release in the community.

<sup>e</sup>Some or all data were estimates.

**APPENDIX TABLE 7 (continued)**  
**Adults exiting parole, by type of exit, 2018**

Jurisdiction	Total reported	Completion	Returned to incarceration				Absconder	Other unsatisfactory <sup>a</sup>	Death	Other <sup>b</sup>	Other/not reported
			With new sentence	With revocation	To receive treatment	Other/unknown					
West Virginia	1,825	1,384	13	232	0	0	140	0	56	0	0
Wisconsin	124	..	..	..	..	..	~	..	124	..	~
Wyoming	617	390	30	154	0	0	31	7	5	0	0

Note: Based on reported data only. For imputed exits from parole, see appendix table 5. Counts may not be actual as reporting agencies may provide estimates on some or all detailed data.

..Not known.

~Not applicable.

<sup>a</sup>Includes persons discharged because they were released to special sentence. Also includes closure due to deportation, pending parole institutional hearing, other revocations, other unsuccessful discharges, and early terminations.

<sup>b</sup>Includes 1,642 parolees who were transferred to another state and 12,238 parolees who exited for other reasons.

<sup>c</sup>Some or all data are estimates.

Note: Counts were rounded to the nearest 100. Details may not sum to totals due to rounding. Data quality may vary across jurisdictions for counts of entries and exits. Therefore, the population on December 31, 2017 does not equal the population on January 1, 2017, plus entries, minus exits. Rates are based on the total community-supervision, probation, and parole population counts as of December 31 of the reporting year and were calculated using U.S. Census Bureau estimates of the U.S. resident population of persons age 18 or older for January 1 of the following year.

..Not known.

<sup>a</sup>The January 1, 2017 population excludes 10,822 persons. The December 31, 2017 population excludes 13,302 parolees who were also on probation to avoid double counting. See *Methodology*.

<sup>b</sup>Reported data will equal estimated data in cases where no imputation was required.

<sup>c</sup>Rates were calculated using the estimated U.S. adult resident population in each jurisdiction on January 1, 2018.

<sup>d</sup>See *Probation: Explanatory notes for 2017* and *Parole: Explanatory notes for 2017* for more details.

<sup>e</sup>The only exits reported were deaths.

Note: Data quality may vary across jurisdictions for counts of entries and exits. Therefore, the population on December 31, 2017 does not equal the population on January 1, 2017, plus entries, minus exits. Counts may not be actual as reporting agencies may provide estimates on some or all detailed data. Rates are based on the probation population counts as of December 31 of the reporting year and were calculated using U.S. Census Bureau estimates of the U.S. resident population of persons age 18 or older for January 1 of the following year.

..Not known.

<sup>a</sup>Reported data will equal estimated data in cases where no imputation was required.

<sup>b</sup>Rates were calculated using the estimated U.S. adult resident population in each jurisdiction on January 1, 2018.

<sup>c</sup>See *Probation: Explanatory notes for 2017* for more details.

<sup>d</sup>The only exits reported were deaths.

Source: Bureau of Justice Statistics, Annual Probation Survey, 2017; and U.S. Census Bureau, National Intercensal Estimates, 2018.

Wyoming	816	655	655	585	585	886	70	8.6	201

Note: Data quality may vary across jurisdictions for counts of entries and exits. Therefore, the population on December 31, 2017 does not equal the population on January 1, 2017, plus entries, minus exits. Counts may not be actual as reporting agencies may provide estimates on some or all detailed data. Rates are based on the parole population counts as of December 31 of the reporting year and were calculated using U.S. Census Bureau estimates of the U.S. resident population of persons age 18 or older for January 1 of the following year.

..Not known.

<sup>a</sup>Reported data will equal estimated data in cases where no imputation was required.

<sup>b</sup>Rates were calculated using the estimated U.S. adult resident population in each jurisdiction on January 1, 2018.

<sup>c</sup>Includes Post-Release Community Supervision and Mandatory Supervision parolees: 44,998 on January 1, 2017 and 45,899 on December 31, 2017, with 26,418 parole entries and 25,517 parole exits.

<sup>d</sup>The only exits reported were deaths.

**APPENDIX TABLE 14 (continued)**  
**Adults entering parole, by type of entry, 2017**

Jurisdiction	Total reported	Discretionary <sup>a</sup>	Mandatory <sup>b</sup>	Reinstatement <sup>c</sup>	Term of supervised release <sup>d</sup>	Other	Unknown/ not reported
West Virginia	2,107	2,034	73	0	0	0	0
Wisconsin	..	..	..	..	..	..	..
Wyoming	655	577	0	78	0	0	0

Note: Based on reported data only. For imputed entries to parole, see appendix table 13. Counts may not be actual as reporting agencies may provide estimates on some or all detailed data.

..Not known.

~Not applicable.

<sup>a</sup>Includes persons entering due to a parole board decision.

<sup>b</sup>Includes persons whose release from prison was not decided by a parole board and persons entering due to determinate sentencing, good-time provisions, or emergency releases.

<sup>c</sup>Includes persons returned to parole after serving time in prison due to a parole violation. Depending on the reporting jurisdiction, reinstatement entries may include only parolees who were originally released from prison through a discretionary release, mandatory release, or a combination of both. May also include those originally released through a term of supervised release.

<sup>d</sup>Includes persons sentenced by a judge to a fixed period of incarceration based on a determinate statute immediately followed by a period of supervised release in the community.

<sup>e</sup>Some or all data were estimates.

Two or more races <sup>a</sup>	1	<1
<b>Status of supervision</b>	100%	100%
Active	85	82
Inactive	4	5
Absconder	6	8
Supervised out of state	4	4
Financial conditions remaining	<1	0
Other	2	2
<b>Maximum sentence to incarceration</b>	100%	100%
Less than 1 year	5	7
1 year or more	95	93
<b>Most serious offense</b>	100%	100%
Violent	26	33
Sex offense	...	9
Other violent offense	...	24
Property	25	20
Drug	37	29
Weapons	...	4
Other <sup>b</sup>	...	13

Note: Details may not sum to totals due to rounding. Estimates for 2007 may have been revised based on updated reporting and may differ from numbers in past reports. Characteristics are based on parolees with a known status.

...Not available.

<sup>a</sup>Excludes persons of Hispanic origin (e.g., “white” refers to non-Hispanic whites and “black” refers to non-Hispanic blacks).

<sup>b</sup>Includes public-order offenses.

Source: Bureau of Justice Statistics, Annual Parole Survey, 2007 and 2017.

The Bureau of Justice Statistics of the U.S. Department of Justice is the principal federal agency responsible for measuring crime, criminal victimization, criminal offenders, victims of crime, correlates of crime, and the operation of criminal and civil justice systems at the federal, state, tribal, and local levels. BJS collects, analyzes, and disseminates reliable statistics on crime and justice systems in the United States, supports improvements to state and local criminal justice information systems, and participates with national and international organizations to develop and recommend national standards for justice statistics. Jeffrey H. Anderson is the director.

This report was written by Danielle Kaeble and Mariel Alper, Ph.D. (former BJS). Todd Minton and Laura Maruschak verified the report.

Edrienne Su and Jill Thomas edited the report. Carrie Epps produced the report.
