

A dedicated chapter to talk you through how best to approach the SQE 1 assessment questions, providing helpful hints of what to look for, what to avoid, and worked examples of how to approach a question.

Practice Questions

The SQE Prep & Practice platform has a sophisticated bank of 200 MCQs for each topic to help students test their knowledge of the content. They mirror the style and rigour of the type used in the SQE 1 assessment.

MCQ-Specific Feedback

Each practice question comes with answer-specific feedback to enable you to apply and consolidate your learning. You can identify mistakes you made, or help strengthen the rationale behind your correct answers.

Once you have revised and you're ready to sit the assessments, see how you fare under exam conditions with two mini-mock assessments consisting of new, unseen questions. In the actual exam you need to answer each question in about 100 seconds, so you need to practise answering under timed conditions. Ultimately, this will help you assess whether you are ready to sit the real exam.

Mock Assessments

The gradebook can be used to gauge your progress anonymously with your peers. Your most recent test scores will be recorded so you can check where the gaps in your knowledge are and focus on improving your lower scoring areas.
