

How To Use This Resource

Functioning Legal Knowledge

Each chapter begins with a list of the functioning legal knowledge from the assessment specification that is covered in that chapter. This will enable you to draw out the main themes and learning objectives of the chapter and should also be helpful when you are revising as a quick way to check that you have a grasp of the key knowledge requirements.

Look for the example boxes which illustrate how the law operates in a realistic practice situation, enlivening the text and providing you with a valuable insight into how the legal principles and procedures covered in the book are used in practice.

Authorities Underpinning Practice

The key authorities that underpin practice are hyperlinked at the start of each chapter for easy reference, and court forms are linked to throughout. This facilitates engagement with the underpinning rules which helps you understand how they are applied in practice.

Look out for conduct points, featured throughout, to identify situations in which an awareness of best practice and professional conduct is essential, and to find practical advice and guidance on how to act should you encounter such situations in practice.
