

We use Blackboard – how do we integrate an Oxford Learning Link course package?

1. Contact Oxford Learning Link Support to obtain your Key and Secret:

Extended Live Support Hours: Monday – Friday: 9am – 11pm Eastern

Saturday: 11:30am – 8pm Eastern

Sunday: 11:30am – 11pm Eastern

855-281-8749

(immediate response; you will be asked for an email address to which we will send the key and secret)

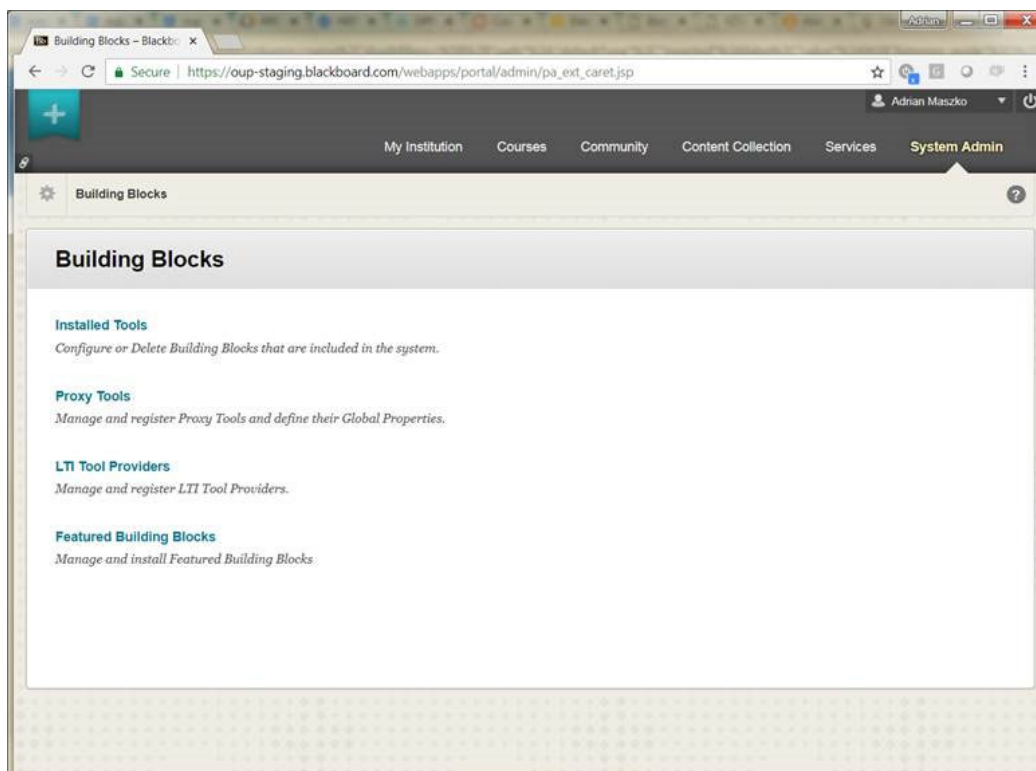

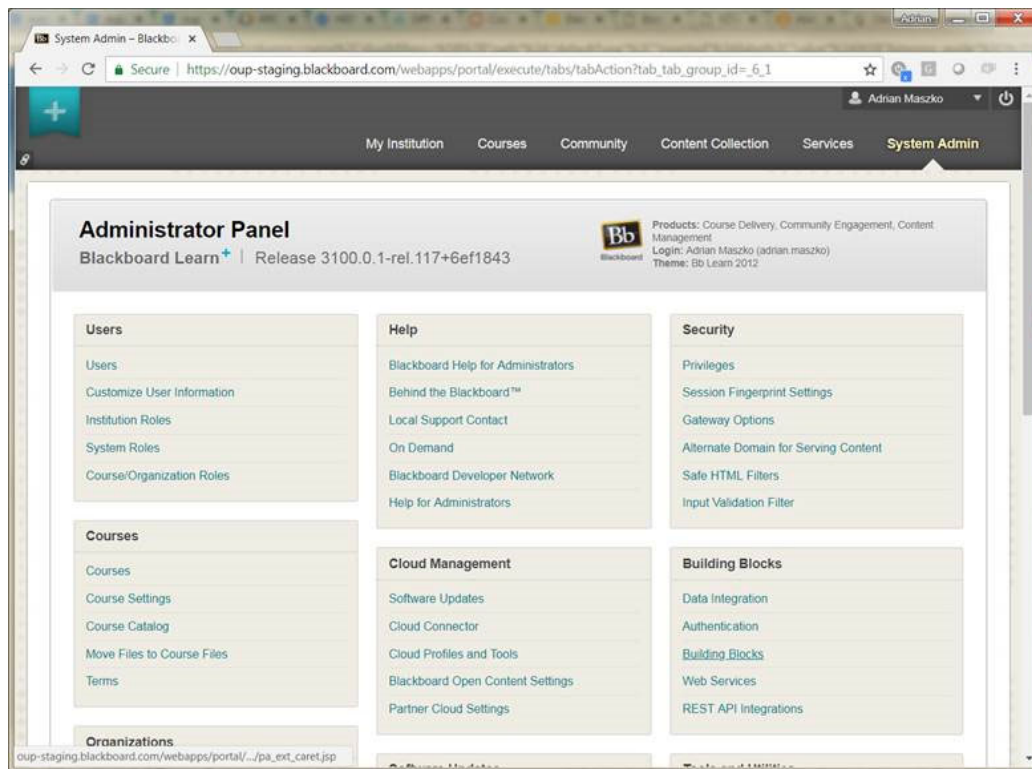

learninglink.support@oup.com (turnaround time less than 24 hours)

Note: OUP technical support is provided by HudsonSoft, so any written response may come from a hudsonsoft.com email address.

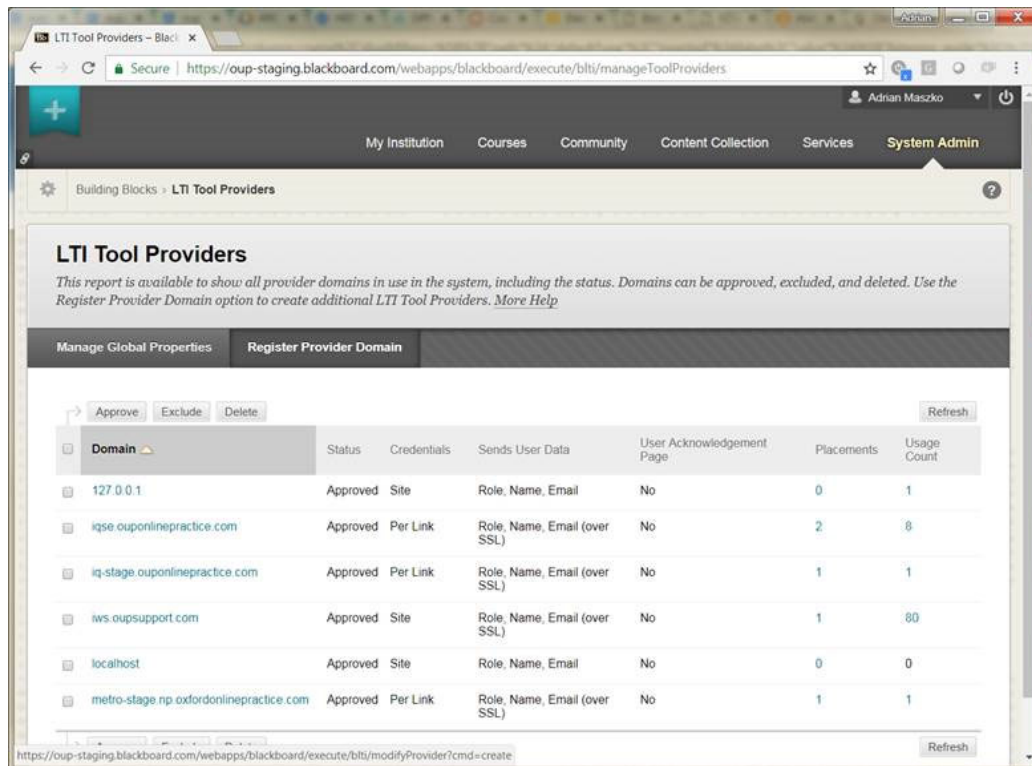

When you call, please also have available the email address from your LMS/VLE settings for each instructor, including any teaching assistants, who will need instructor-level access to this content. This is critical as we need to verify that the email address(es) in your LMS/VLE settings match exactly the email address(es) OUP has for them in our system. If those addresses do not match, the instructors will not be able to view the content.

Please note that the student email addresses in the LMS/VLE settings need to be the email address connected to their access. To ensure that the student's registration matches their account in your LMS/VLE, students need to register their access code or purchase code through the course content in your LMS/VLE.

2. From the System Admin > Building Blocks menu click "Building Blocks".

3. Click "LTI Tool Providers" and then click "Register Provider Domain".

4. Enter the following:

Provider Domain: iws.oupsupport.com

Provider Domain Status: Approved

Default Configuration: Set globally

Tool Provider Key: [Your provided key]

Tool Provider Secret: [Your provided secret]

Send User Data: Send user data only over SSL

User Fields to Send: Role in Course; Email Address; and Name (IF the cartridge will be integrating with other tools, such as GoReact. Ticking this option will allow student names to appear in the gradebook of the integrated tools).

Show User Acknowledgment Message: No

Tool Provider Custom Parameters: hideCreditCardPurchase=true.

Nb. If your institution has purchased IA, you can include the above to avoid confusing your students. This will disable the credit card purchasing option for them when they are redeeming access to content.

Click "Submit".

Register Provider Domain

6. Click "Import Package".

7. Enter the Destination Course ID or Browse for the destination course.

8. Click "Browse My Computer" and select the imsc file provided to you. Under Select Course Materials choose "Select All". Click Submit.

9. Return to your course and select your resource folder from the course menu to browse the content added to the course. Resource folder name will be based on the Author/Text you wish to use. Ex. Starr Pilot
